I'm a Flutter developer who enjoys building mobile apps that are simple, useful, and easy to use. I have good experience with Dart and like writing clean, organized code. I'm always learning new things about Flutter and improving my skills to make better apps. I work well with teams and like solving problems in a practical way.

Experience:

Freelance Flutter Developer – Self-Employed

(Oct 2025 – Present)

- App Deployment: Developed and published multiple apps (e.g., Alnoorfood, Mkanak) to Google Play and App Store with Laravel API integration.
- Advanced Solutions: Built custom automation tools and games using Android Accessibility Services and AdMob.

Flutter Developer Intern – Link Development

(Jul 2025 – Aug 2025)

- Developed cross-platform mobile apps using Flutter with clean code, state management, Firebase, and API integration.
- Collaborated in Agile environments to design features and implement interactive UI components and animations.

Education:

Bachelor Degree of Electrical Engineering – PortSaid University

(Sep 2021 – Present)

- Communications and Electronics Department.

Current Grade: Very Good.

Expected Graduation Year: 2026

Courses & Training:

Digital Egypt Pioneers Program (DEPI) – Cross Platform Mobile App Developer

(Jun 2025 – Dec 2025)

- Successfully completed the DEPI program for software development, specializing in cross-platform mobile application deployment.

Full Stack Web Development with PHP & Laravel – Information Technology Institute (ITI)

(Aug 2024 – Oct 2024)

- Developed a secure Full Stack e-commerce platform using PHP and Laravel, featuring an integrated admin dashboard for efficient product and category management.

Projects

Mkanak - Real Estate Rental App (Flutter) [Google play link](#)

- Developed a full-stack mobile rental app using Flutter and PHP/MySQL, featuring Paymob payments, Google Maps, real-time chat, and Firebase notifications.

Alnoorfood App (Flutter) – Freelance [Google play link](#) [Apple Store link](#)

- Maintenance & Updates: Enhanced UI and fixed bugs within an existing Flutter codebase.
 - API Integration: Integrated and optimized RESTful APIs with a Laravel backend.
 - Deployment: Successfully published the application to Google Play and App Store.
-

Snake Game - Feature-Rich Arcade Game (Flutter)

[GitHub link](#)

- Collaboratively developed a feature-rich Flutter snake game as a freelance project, featuring multiple game modes, an in-game store, and integrated AdMob/Unity ads.

Auto Click - Social Media Automation Tool (Flutter)

[GitHub link](#)

- Collaboratively developed a freelance automation app using Flutter and Android Accessibility Services to perform automated tasks and gestures on social media platforms, integrated with Firebase for remote task management.

E-Commerce Mobile App (Flutter) – Internship Project at Link Development

[GitHub link](#)

- Built a seamless e-commerce mobile application using Flutter and Dart, featuring secure product browsing and a clean UI.

Posts App - Clean Architecture Implementation (Flutter)

[GitHub link](#)

- Developed a robust post management application using Flutter and Clean Architecture, implementing BLoC for state management and dependency injection to ensure a highly scalable, maintainable, and testable codebase.

Charity - Donation & Zakat Management App (Flutter)

[GitHub link](#)

- Developed a comprehensive charity application using Flutter and Firebase (Auth, Firestore, Storage), featuring a real-time Zakat calculator and BLoC state management.
