[Portfolio](#) | 01028959943 | 01210267432

Career Objectives:

Backend Engineer (Laravel/Node.js) with a strong Engineering and Competitive Programming (ECPC) background. I specialize in architecting secure RESTful APIs, optimizing database performance, and leveraging prior Frontend experience to deliver holistic, scalable web solutions.

Education:

Port Said University | B.Sc. in Electronics & Communications Engineering (2021 – 2026) Focused on Computer Networks, IoT, and Embedded Systems, applying strong analytical skills to solve complex engineering problems.

Work and Internship Experience:

- **Internship | Homainis (Remote) Nov 2024 – Feb 2025**
 - Collaborated with backend teams to optimize RESTful API consumption and response structures.
 - Worked in an Agile Scrum environment, participating in sprints and stand-up meetings.
- **Internship | Uneeq Interns (Remote) Sep 2024 – Nov 2024**
 - Developed a secure LMS Backend (Node.js/MongoDB), implementing RBAC middleware and Cloudinary for scalable media handling.
 - Architected a RESTful E-commerce API (Laravel), optimizing database schemas and integrating Sanctum (JWT) for stateless authentication.
 - Built an interactive E-learning interface using Vanilla JS, boosting user retention by 20% via dynamic DOM manipulation.
- **Summer Training | ITI (Port Said, Egypt) Aug 2024 – Oct 2024**
 - Developed a Laravel admin dashboard for dynamic inventory and category management.
 - Applied security best practices, eliminating potential SQL Injection vulnerability.
- **Scholarship Program | ALX 12-Month (Remote) Jul 2023 – Nov 2024**
 - Optimized API integration for a Social Media platform (100+ users), ensuring efficient data consistency for likes, comments, and search features.
 - Managed complex API state and data handling for a Codeforces-like platform, synchronizing code submissions with the Node.js backend
 - Developed a Simple Shell in C, handling command execution and process management.
 - Implemented a custom version of printf() in C (Variadic Functions), handling formatted output without using the standard library function.

Skills:

Backend Core: PHP (Strong), Laravel (Advanced), Node.js, Express.js

Database & Architecture: MySQL, PostgreSQL, MongoDB, Database Design, Schema Optimization.

Concepts & Best Practices: OOP, SOLID Principles, MVC, Data Structures & Algorithms.

DevOps & Tools: Git, GitHub, Docker, Linux (Kali familiarity/Terminal), Postman/Swagger (API Documentation).

Familiar with: React.js, Tailwind CSS.

Extracurricular Activities:

- **ECPC Contestant (2023, 2024)** – Participated in the Egyptian Collegiate Programming Contest ECPC for two consecutive years, Solved 100+ algorithmic challenges.
 - **Competitive Programmer** – Solved 500+ problems on Codeforces & LeetCode, boosting problem-solving efficiency.
 - **Problem Setter | ICPC PSU Community** – Designed 5+ original problems for ECPC, 20+ problems for training 500+ ICPC participants.
 - **IEEE Trainee Trainer** – Delivered 50+ training sessions on data structures & algorithms.
-

Certificates:

- 12 Month ALX Software Engineering & Web Development Programme – ALX | 2024
 - PHP Web Development – ITI | 2024
 - CCNA (Cisco Certified Network Associate) – Cisco | 2024
 - CCNA Training Certification – NTI (National Telecommunication Institute) | 2024
-

Courses:

- CCNA (Cisco Certified Network Associate) – NTI & Cisco | 120 Hours.
 - Git, GitHub, Linux, bash script, C & Python – ALX | 12 Months.
 - Advanced React.js & JavaScript (ES6+, Async/Await) – Self-Learning.
 - Problem Solving with C++ – ICPC PSU Community & Self-Learning | Ongoing.
-

Additional Information:

- **Languages:** Arabic (Native), English (Intermediate).
- **Availability:** Open for internships and full-time opportunities.
- **Military Status:** Exempt.
- **References:** Available upon request.
